ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: ASSEMBLY FOR REGULATING THE TEMPERATURE OF AN INTEGRATED CIRCUIT

(57) Abstract: A mechanical assembly, for regulating the temperature of an electronic device, includes a gimbal and a heat-ex-
changer which is attached to the gimbal. The gimbal includes a base member, a carrier member, and a spring which has -1) a first
end with a rigid coupling to one of the base and carrier members, and 2) a second end with a slideable coupling to the remaining
member. The slideable coupling prevents any gap from occurring between the heat-exchanger and the electronic device when they
are pressed together.
