PLANT-BASED SIMULATED EGG COMPOSITIONS

ABSTRACT

The present invention is directed to plant-based vegan simulated egg compositions, methods of producing such compositions and a kit. More particularly, the invention provides, for example, vegan simulated powdered baking egg compositions comprising the components: potato starch, sucrose ester, plant protein, plant fiber, double-acting baking powder and a gum, hanjuku egg compositions comprising a simulated egg yolk encased within a simulated egg white, and salted egg sauce compositions comprising, chickpea, water, oil, yeast extract, natural food flavoring, natural orange food coloring, soy sauce, basil leaves, chilli powder, guar gum and salt, which all provide a functional and sensory substitute for the equivalent products made using natural eggs, methods of manufacture, and kits comprising said compositions.
