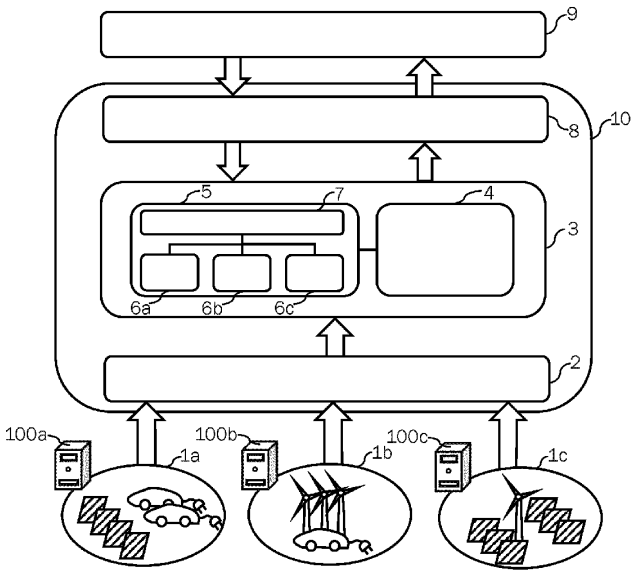
(54) Title: APPARATUS AND METHOD FOR GENERATING EVALUATION DATA OF FACILITIES AND PROJECTS

Figure 1



(57) Abstract: The present subject matter relates to an apparatus, a system, a method and a computer program for generating evaluation data of eco-friendly facilities and related projects. The evaluation data is generated based on measuring data received from green facilities by calculating and aggregating key performance indicators (KPI). The calculation/aggregation of the KPIs is performed on distributed resources using, for example, a cloud-based network and blockchain technology.
