(54) **Title:** RADIO COMMUNICATION SYSTEMS AND RADIO COMMUNICATION METHODS**FIG 1A**

(57) **Abstract:** According to various embodiments, a radio communication system may be provided. The radio communication system may include: a portable device; a beacon receiving device; and a server. The portable device may include: a transmitter configured to repeatedly transmit signals; and a receiver configured to receive data from the server. The beacon receiving device may include: a receiver configured to receive signals from the portable device; and a transmitter configured to transmit an indication to the server based on the received signal. The server may include: a receiver configured to receive the indication from the beacon receiving device; and a transmitter configured to transmit data to the portable device based on the indication.
