ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: NON-AQUEOUS COATING COMPOSITIONS FORMED FROM SILANES AND METAL ALCOHOLATES

(57) Abstract: A non-aqueous coating composition is obtained by mixing (A) at least one silane, such as phenyltrimethoxysilane, methyltrimethoxysilane; and (B) vinyltriacetoxysilane and/or colloidal aluminum hydroxide and/or at least one metal alcoholate. Optional additives include ethyl orthosilicate, ethyl polysilicate or colloidal silica in a lower alkanol and boric acid, which may be dissolved in a lower alkanol. Hard corrosion resistant coatings, which are substantially transparent, are obtained. These coatings may be applied to metallic or non-metallic surfaces.
