INTERNATIONAL APPLICATION PUBLISHED UNDER THE PATENT COOPERATION TREATY (PCT)

(51) International Patent Classification ⁶: C07C 69/593, 57/13	A1	(11) International Publication Number: WO 97/09296 (43) International Publication Date: 13 March 1997 (13.03.97)
(21) International Application Number: PCT/EP96/03977 (22) International Filing Date: 6 September 1996 (06.09.96) (30) Priority Data: 95306300.5 8 September 1995 (08.09.95) EP (34) Countries for which the regional or international application was filed: GB et al. (71) Applicant: SHELL INTERNATIONALE RESEARCH MAATSCHAPPIJ B.V. [NL/NL]; Carel van Bylandtlaan 30, NL-2596 HR The Hague (NL). (72) Inventors: CLARK, Michael, Thomas; Thornton Research Centre, Pool Lane, Ince, Chester CH1 3SH (GB). VERK- OUW, Hendrik, Tjimen; Sittingbourne Research Centre, Broad Oak Road, Sittingbourne, Kent ME9 8AG (GB).		(81) Designated States: AU, BR, CA, CN, HU, JP, KR, RU, SG, European patent (AT, BE, CH, DE, DK, ES, FI, FR, GB, GR, IE, IT, LU, MC, NL, PT, SE). Published <i>With international search report.</i> <i>Before the expiration of the time limit for amending the claims and to be republished in the event of the receipt of amendments.</i>
(54) Title: ALKENYL-SUBSTITUTED DICARBOXYLIC ACID OR ANHYDRIDE ESTER DERIVATIVES (57) Abstract Alkenyl-substituted dicarboxylic acid or anhydride ester derivatives, useful as dispersant additives in lubricating oil compositions, having an alkenyl group derived from an atactic propylene oligomer substantially of formula (I), where n is in the range 15 to 120, having number average molecular weight (M_n) in the range 700 to 5000, and molar ratio dicarboxylic acid or anhydride moieties:atactic propylene oligomer in the range 1:1 to 2:1, and having an ester group derived from a polyol; a process for their preparation; and lubricating oil compositions and concentrates containing them. $\begin{array}{c} \text{CH}_3 \qquad \qquad \text{CH}_3 \\ \qquad \qquad \qquad \\ \text{H} - (\text{CH} - \text{CH}_2)_n - \text{C} = \text{CH}_2 \end{array} \quad (I)$
