(54) Title: CLEAVAGE ACCESSORY FOR A BRASSIERE

Fig. 1

(57) Abstract: The invention is directed to an accessory which is fabricated and shaped to cover the bosom area of body. It is particularly useful when applied to a brassiere showing a cleavage of a human body at a center thereof. The accessory, when applied to a brassiere will cover the cleavage area of a wearer to simulate an undergarment. The inventive accessory can be removed from the brassiere when the person is in a different social setting. The accessory can be fabricated from different materials but it is preferred to be stretchable so that it can be applied to differently sized brassieres and the accessory, additionally, can move with the movements of the wearer. It is preferred that the fabric of the accessory be doubled over so that most of the fastening elements do not touch the skin of the wearer which adds to the comfort of wearing the accessory.
