(54) Title: METHODS OF TREATING PULMONARY FIBROSIS

(57) Abstract: The present invention relates to compositions, methods and kits for the treatment or prevention of a condition of the airway or lung involving fibrosis. In particular, the compositions, methods and kits are particularly useful, but not limited to, the treatment or prevention of pulmonary fibrosis, such as idiopathic pulmonary fibrosis. In one aspect, the present invention provides method of treating or preventing a condition of the airway or lung involving fibrosis in a subject in need thereof, the method comprising administering to the subject an antisense oligonucleotide (AON) that promotes the production of endogenous soluble RAGE, thereby treating or preventing a condition of the airway or lung involving fibrosis in a subject.
