(54) Title: A METHOD AND APPARATUS FOR FACILITATING THE MANAGEMENT OF HEALTH AND SECURITY

FIGURE 1

(57) Abstract: The present invention relates to a method and apparatus for facilitating the management of health and security remotely from a patient's home. The apparatus provides a communications device, including video, enabling a patient to communicate with a remote monitoring centre. A security monitoring arrangement enables home security, such as personal alarms, to be monitored. A health monitoring arrangement enables vital signs and other health signs to be monitored. A patient may video communicate with health professionals, such as doctors and nurses.
