(54) Title: A METHOD OF GASIFYING CARBONACEOUS MATERIAL AND A GASIFICATION SYSTEM

Figure 2

(57) Abstract: A method of gasifying carbonaceous material is described. The method comprises a first step of pyrolysing and partially gasifying the carbonaceous material to produce volatiles and char. The volatiles and the char are then separated and, subsequently, the char is gasified and the volatiles are reformed. The raw product gas is then finally cleaned with char or char-supported catalysts or other catalysts.
