

ABSTRACT

An information display method and apparatus for a virtual chessboard, a computer readable storage medium, a computer program product and an electronic device. The information display method for a virtual chessboard comprises: displaying a first virtual object located in a chessboard battle area, wherein the first virtual object is used for playing a virtual battle in a battle phase of a virtual chessboard game; displaying a second virtual object located in an object exchange area, wherein the second virtual object is used for playing the virtual battle in the battle phase by means of resource exchange; and when the second virtual object is selected to be exchanged and the first virtual object is the same as the second virtual object, displaying first counting information of the first virtual object in the chessboard battle area. The present application can improve the intuitiveness of information display on virtual chessboards.
