(54) Title: APPARATUS AND METHOD FOR PRODUCING PRINT

(57) Abstract: A print producing apparatus of a print producing system is provided with a recording medium conveying section (71) which intermittently conveys a strip-like hologram recording medium (3), a cutting out section (72) which cuts out, as a piece of hologram recording medium, a predetermined region of the recording medium that includes at least a piece of a holographic stereogram image or a hologram from a hologram recording medium, a film retaining section and a film supplying section (74) which one by one provides plural sheets of protecting film PF which are retained, a film opening and closing section (75) which opens and folds a single sheet of the PF which has been folded in two along a folding line of the PF, a mounting retaining and supplying section (76) which one by one provides plural sheets of mountings, and a laminating section (77) which laminates the recording medium piece for hologram and the mounting with the PF.
