(54) Title: INTERCONNECT ASSEMBLY FOR A PROBE CARD

(57) Abstract: An interconnect assembly for providing electrical interconnection between elements of a probe card assembly is provided. The interconnect assembly includes a frame defining a plurality of openings and a plurality of conductive contacts coupled to the frame. Each of the conductive contacts includes (a) a first resilient arm extending away from a first surface of the frame and (b) a second resilient arm extending away from a second surface of the frame. At least one of the first resilient arm or the second resilient arm extends through one of the plurality of openings.
