DE, DK, EE, ES, FI, FR, GB, GR, HR, HU, IE, IS, IT, LT,

(54) Title: FUNCTIONALIZED DISACCHARIDASE COMPOSITIONS

(57) Abstract: The present invention relates to a composition comprising a solid carrier, a protein disaccharidase or a fragment thereof immobilized on the surface of the solid carrier, a protective layer to protect the protein disaccharidase or a fragment thereof by embedding the protein disaccharidase or a fragment thereof, and a functional constituent immobilized on the surface of the protective layer, wherein the functional constituent immobilized on the surface of the protective layer is a polymer comprising repeat units wherein each repeat unit comprises at least one amino group and/or at least one thiol group. The present invention also relates to methods of producing said composition.
