

## **Carbonized product-containing granules and method for producing them and use**

### **Abstract**

5

The invention relates to granules for use as building materials or as aggregates in building materials. The invention further relates to methods for producing the granules and the use thereof. The granule according to the invention contains a binder and a carbonized product, the content of the carbonized product in the granules amounting to 30 wt.-% or more, relative to the total weight of the binder and the carbonized product in the granules.
