

ABSTRACT

PARTITION PANEL ADJUSTER IN AQUARIUM TANK

A partition panel adjuster in an aquarium tank (1) includes a pair of adjuster panels (21) laterally slidably attached to the opposite side ends of a partition panel (5) inserted between the opposite side walls (1a) of a tank body (2), guide means (22) for guiding the adjuster panels to slide laterally, and biasing means (25) for biasing the adjuster panels away from each other to closely contact the opposite side walls of the tank body.
