METHOD OF TREATING LIVER CANCER, PREDICTING RESPONSE TO TREATMENT, AND PREDICTING ADVERSE EFFECTS DURING THE TREATMENT THEREOF

ABSTRACT

This technology relates to a method of treating a liver cancer, and a method of predicting a response of a subject suffering from liver cancer to a treatment with an immune checkpoint inhibitor. This technology further relates to a method of predicting a treatment-induced immune-related adverse events (irAEs) of a subject suffering from liver cancer to a treatment with an immune checkpoint inhibitor.
