(54) **Title:** IMPROVED PROCESS FOR DRY FLOWER CRAFT

(57) **Abstract:** An improved process for dry flower craft which comprises cutting craft media (dry botanicals with stencils) and mounting the same on any surface of product with combination of other botanical elements like bamboo, grass, weeds, seed, stem, tendrils, fiber, solawood in any desired manner including artistic manner, which comprises reducing color loss while drying and storage of vegetation and also during crafting of the vegetation, making stencils of cheapest materials such as carboard and paper, cutting out motifs; shaping the petals in any desired shape, pasting the same with known adhesives, characterized in that botanicals are dried prior to floral collage decoupage by drying while using mixture desiccant of silica gel + silver sand + non iodised salts (1 : 1 ratio), finally obtaining floral decoupage or only floral collage or a combination of both in design processing as application of the craft, making the floral resin laminates by reducing the peroxide harder by 1%.
