

IMAGE PROCESSING METHOD AND APPARATUS, AND ELECTRONIC DEVICE, STORAGE MEDIUM AND COMPUTER PROGRAM

ABSTRACT

An image processing method and apparatus, and an electronic device, a storage medium and a computer program. The method comprises: performing first segmentation processing on an image to be processed, and determining a segmentation region of a target in said image (S11); determining, according to the position of the center point of the segmentation region of the target, an image region where the target is located (S12); and performing second segmentation processing on the image region where each target is located, and determining the segmentation result of the target in said image (S13).
