(54) Title: COMPOSITIONS AND METHODS COMPRISING ANTIBODIES THAT BIND TO COVALENT PEPTIDE CONJUGATES

(57) Abstract: Provided are compositions and methods that include binding partners that bind with specificity to target sites on proteins or peptides that comprise a covalently attached molecule. The binding partners are provided as antibodies and antibody derivatives that specifically bind to proteins and peptides that have been covalently modified by attachment of a molecule, such as a drug. The binding partners can bind with specificity to covalently modified peptides when presented in the context of a major histocompatibility complex (MHC). Uses of the compositions and methods for prophylaxis or therapy of disorders are also provided.
