ABSTRACT

Provided is a resin powder comprising a vinyl alcohol polymer, which exhibits improved drying efficiency. A resin powder: comprising a vinyl alcohol polymer; having an average particle diameter of 100 to 2,000 μm; and the number of particles having bubbles of 1 μm or larger is 10 or more, among 100 particles arbitrarily extracted from particles having a particle diameter of 106 to 1,000 μm in the resin powder.
