IMPROVED LIQUID VALVEA B S T R A C T

5 A valve for liquid drain is disclosed. The valve comprises
a body (5) that is adapted to fit into the drain and has a
drain aperture (13). The valve also comprises a valve
element (15) that is movable from a closed position in
which the valve element (15) closes the drain aperture (13)
to an open position thereby opening the drain aperture
(13). The valve element (15) is constructed to move from
the closed to the open position in response to liquid
10 flowing into the valve.
