(54) Title: HIGH-POWER MICROWAVE WINDOW

(57) Abstract: A microwave window structure for a low-pressure chamber. The window structure enables microwave energy to be introduced into the chamber from a source external to the chamber. The window structure includes a fixture, adapted for mounting to a sidewall portion of the chamber, having electrically conductive walls. Inner portions of the walls provide a peripheral region of an aperture within such fixture. A solid, microwave energy transparent dielectric window is included. The window includes: a periphery portion affixed to the fixture; and, an inner region disposed within the aperture of the fixture.
