(54) Title: IDENTIFYING SPOOFED MARITIME SIGNALS USING INFORMATION FROM OTHER VESSELS

FIG. 3B

(57) Abstract: A method, system and product for identifying spoofed maritime signals using information from other vessels. The method comprises obtaining one or more location reporting signals of a maritime vessel, wherein the one or more location-reporting signals comprise one or more respective sets of geographical coordinates, each of which having a timestamp. The method further comprises determining that the one or more location reporting signals are at least partially fabricated, wherein said determining is based on a contradiction between a content of the one or more location-reporting signals and information derived from location-reporting signals received from other maritime vessels. The method further comprises performing a responsive action.
