

A B S T R A C T

Two kinds of user-tailored searchers,
narrow-search-range searchers (3, 4) and a
wide-search-range searcher (5), are set out of a
plurality of groups of searchers in compliance with the
5 features of two kinds of multi-paths in mobile
communication, and are used, thereby making it possible
to search efficiently with high accuracy and on reduced
hardware and software scales.
