(54) Title: SET OF MODULAR COMPONENTS FOR BUILDING TRANSPARENT WALLS AND WALLS MADE THEREOF

(57) Abstract

Set (100) of modular components for building transparent removable walls (50) comprising at least a hollow modular plastic block component (1) provided on the perimetral sides thereof with male and female detachable coupling means (11, 12, 13), which set (100) preferably further comprises at least one further one-piece angulated plastic block component (16, 17) and/or at least an extruded stiffening metal section (20) and/or a terminating/fastening section (21, 22) for perimetally terminating the wall (50) and fastening the latter (50) to the room in which said block wall (50) is built. No adhesives are used and the slots between abutting blocks (1, 16, 17) are closed by a removable plastic or metal tape (53) which is preferably colored like said metal sections (20, 21, 22).
