(54) Title: APPARATUS FOR HANDLING CELLS, EMBRYOS OR OOCYTES

(57) Abstract: Apparatus for handling cellular entities
comprises a first substrate having an array of first wells
open to a first major surface of the first substrate, said first
wells being adapted to hold a cellular entity, the apparatus
further comprises fluidic channels open to each well. The
wells are tapered to locate the cellular entity at a given
location in each well, and the fluidic channels are formed
on the major surface of a further substrate adapted and
arranged to face a major surface of said first substrate,
the further substrate being releasably secured to said first
substrate.
