(54) Title: COMBINATION BAG

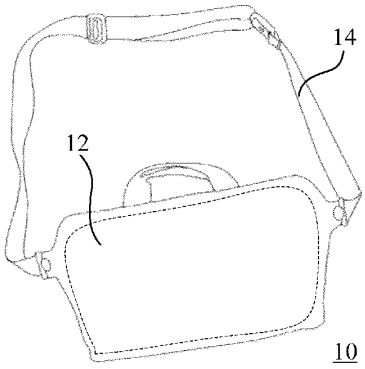

FIG.1

(57) Abstract: A combination bag, includes a sling bag and a backpack with an interior space, wherein the sling bag includes: a flat-shaped and foldable bag body with a first surface and a second surface, a rigid support structure embedded within the bag body, symmetrically arranged along a fold line of the bag body; a shoulder strap attached to the bag body; at least two bag components positioned on the second surface of the bag body, for forming an independent storage compartment; and the interior space is defined by a first wall, a second wall opposite the first wall, and a continuous side wall connecting the first and second walls; wherein the first wall has an area approximately equal to that of the bag body, and the bag body is detachably fixed and close contacted with the first wall by a connecting component.
