

LOW SULFUR METAL DETERGENT-DISPERSANTS

ABSTRACT

- 5 A process for preparing alkylhydroxybenzoate detergent-dispersant additives having low sulfur content and high TBN is described. The alkali metal alkylhydroxylbenzoate, alkaline earth metal alkylhydroxybenzoate and overbased alkaline earth metal alkylhydroxybenzoate reaction products described have a sulfur content in the range of from about 0.1 to 1.2 wt % are effective anti-
- 10 corrosive detergent-dispersant additives in lubricating oil compositions.
