

ABSTRACT

The present application relates to the technical field of communications, and discloses an information determination method, an information sending method, a communication system, an apparatus, and a device. The information determination method is performed by a first device in sidelink communication, and the method comprises: the first device receives a service request sent by a second device, the service request carrying a service type of a ranging/sidelink positioning function; and the first device determines, according to the service type, a policy/parameter used for executing the ranging/SL positioning function.
