

FLOATING STRUCTURE

ABSTRACT

[Problem] To provide a slim floating structure wherein natural gas processing equipment is positioned while ensuring a positioning space for LNG tanks that store a liquefied natural gas.

[Solution] A floating structure comprising: tanks that are transferred from a preexisting LNG cargo ship or a preexisting floating structure, and are positioned continuously in a lengthwise direction of a ship body section; and natural gas processing equipment that is positioned on at least one side among both sides of the tanks in a width direction of the ship body section, wherein the natural gas processing equipment is positioned on the inside in the width direction of the ship body section.
