

ABSTRACT

Provided in the present application are a scheduled team forming method and apparatus in a virtual scenario, and a device and a storage medium. The method is executed by an electronic device, and comprises: displaying a scheduled team forming control of a first object, wherein the scheduled team forming control is used for making a schedule to form a target team comprising the first object; on the basis of the scheduled team forming control, and in response to a team attribute setting operation, determining a set attribute to be a team attribute of the target team, wherein the team attribute comprises at least a scheduled forming time of the target team; and in response to a scheduled determination instruction, which is triggered on the basis of the set team attribute, displaying scheduled forming information carrying the team attribute, wherein the scheduled forming information is used for indicating that the target team comprising the first object is formed at the scheduled forming time, and a second object applies to join the target team on the basis of the scheduled forming information.
