BRIEF DESCRIPTION OF THE PRESENT INVENTION

The present invention relates to duocarmycin-containing antibody-drug conjugates (ADCs) for use in the treatment of human solid tumours and haematological malignancies expressing HER2, in particular breast cancer, gastric cancer, bladder cancer, ovarian cancer, lung cancer, prostate cancer, pancreatic cancer, colorectal cancer, head and neck squamous cell cancer, osteosarcoma, and acute lymphoblastic leukaemia.

In one aspect, there is provided the use of a compound of formula (I)

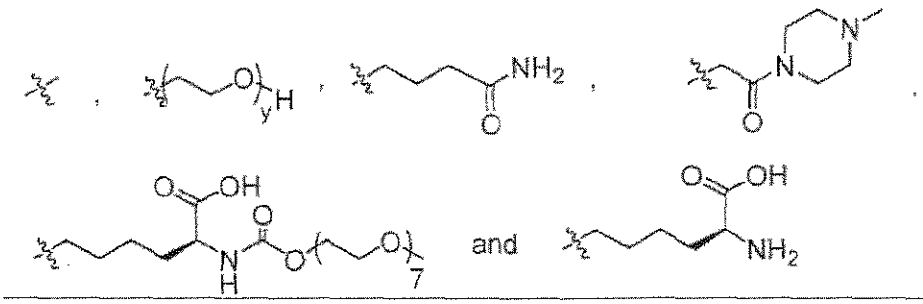

wherein

anti-HER2 Ab is an anti-HER2 antibody or antibody fragment,

n is 0-3,

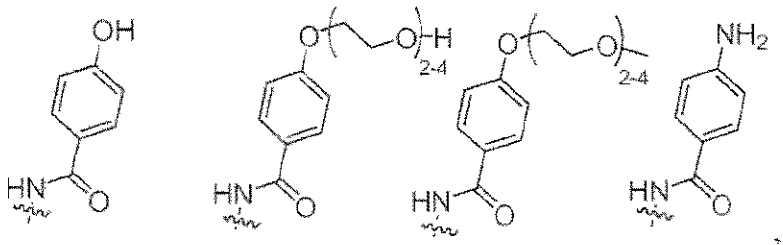

m represents an average DAR of from 1 to 4,

R^1 is selected from

y is 1-16, and

R^2 is selected from

in the manufacture of a medicament for the treatment of human solid tumours and haematological malignancies expressing HER2.

In one aspect, there is provided the use of a combination of a compound as disclosed herein with a therapeutic antibody and/or a chemotherapeutic agent, in the manufacture of a medicament for the treatment of human solid tumours and haematological malignancies expressing HER2.

In one aspect, there is provided a pharmaceutical composition comprising a compound as disclosed herein or a combination as disclosed herein, and one or more pharmaceutically acceptable excipients.

BRIEF DESCRIPTION OF THE DRAWINGS

Figure 1. Antitumor activity of SYD985 compared to T-DM1 in MAXF-1162 PDX model (breast cancer, adenocarcinoma, HER2 IHC 3+, HER2 FISH positive) (CRO: Oncotest).

Figure 2. Antitumor activity of SYD985 compared to T-DM1 in HBCx-34 PDX model (breast cancer, ductal carcinoma, HER2 IHC 2+, HER2 FISH negative, ER and PR positive) (CRO: XenTech).

Figure 3. Antitumor activity of SYD985 compared to T-DM1 in MAXF 449 PDX model (breast cancer, invasive ductal carcinoma, HER2 IHC 1+, HER2 FISH negative, ER and PR negative, i.e. triple negative breast cancer) (CRO: Oncotest).

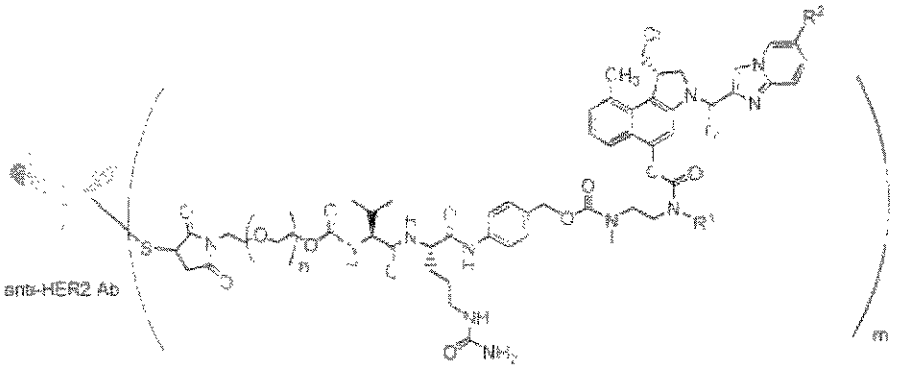

Figure 4. Antitumor activity of SYD985 compared to T-DM1 in HBCx-10 PDX model (breast cancer, ductal adenocarcinoma, HER2 IHC 1+, HER2 FISH negative, ER and PR negative, i.e. triple negative breast cancer) (CRO: XenTech).

Figure 5. Antitumor activity of SYD985 compared to T-DM1 in MAXF-MX1 PDX model (breast cancer, invasive ductal carcinoma, HER2 IHC 1+, HER2 FISH negative, ER and PR negative, i.e. triple negative breast cancer) (CRO: Oncotest).

Figure 6. Antitumor activity of SYD985 compared to T-DM1 in ST313 PDX model (breast cancer, HER2 IHC 2+, HER2 FISH negative, ER and PR positive) (CRO: Start).

CLAIMS

1. Use of a~~A~~ compound of formula (I)

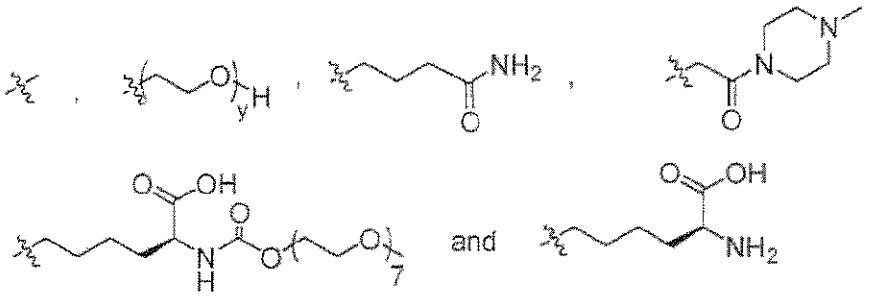

wherein

anti-HER2 Ab is an anti-HER2 antibody or antibody fragment,

n is 0-3,

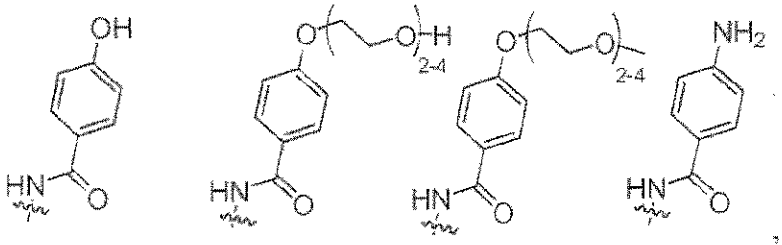

m represents an average DAR of from 1 to 4,

R^1 is selected from

y is 1-16, and

R^2 is selected from

~~for use~~ in the manufacture of a medicament for the treatment of human solid tumours and haematological malignancies expressing HER2.

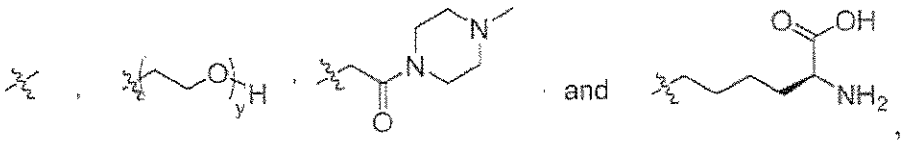

2. ~~A compound for~~ The use according to claim 1, wherein

anti-HER2 Ab is an anti-HER2 antibody or antibody frag

n is 0-1,

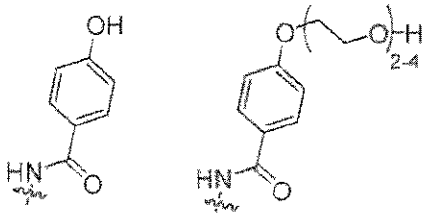

m represents an average DAR of from 1 to 4,

R^1 is selected from

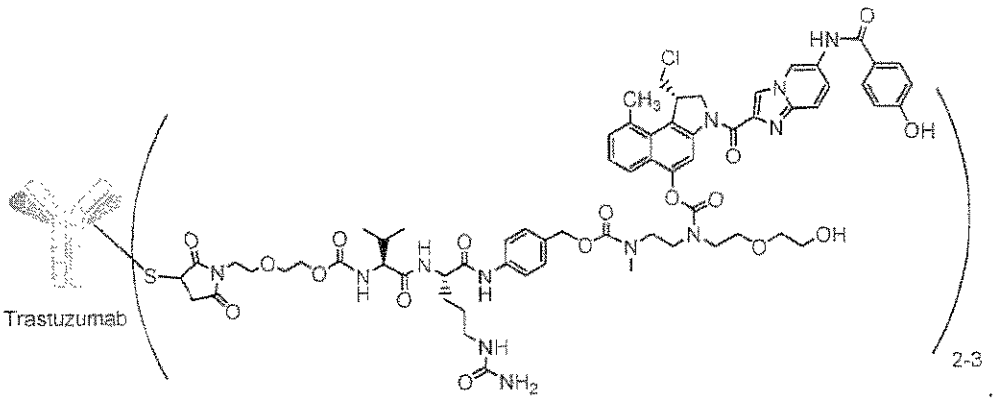

y is 1-16, and

R^2 is selected from

3. ~~A compound for~~The use according to claim 1 or 2 of formula (II)

4. ~~A compound for~~The use according to any one of claims 1 to 3, for ~~use in~~ the treatment of human solid tumours.

5. ~~A compound for~~The use according to any one of claims 1 to 4, wherein the HER2 expressing human solid tumour is breast cancer, gastric cancer, bladder cancer, ovarian cancer, lung cancer, prostate cancer, pancreatic cancer, colorectal cancer, head and

neck squamous cell cancer or osteosarcoma, and the haematological malignancy is acute lymphoblastic leukaemia.

6. ~~A compound for~~The use according to any one of claims 1 to 5, wherein the HER2 expressing human solid tumour is breast cancer or gastric cancer.

7. ~~A compound for~~The use according to any one of claims 1 to 6, wherein the breast cancer is hormone receptor positive or negative.

8. ~~A compound for~~The use according to any one of claims 1 to 7, wherein the human solid tumour is HER2 fflC 2+ or 1+.

9. ~~A compound for~~The use according to any one of claims 1 to 8, wherein the human solid tumour is HER2 FISH negative.

10. ~~A compound for~~The use according to any one of claims 1 to 9, wherein the human solid tumour is triple negative breast cancer.

11. Use of a~~A~~ combination of a compound ~~for use~~ according to any one of claims 1 to 10 with a therapeutic antibody and/or a chemotherapeutic agent, ~~for use in~~in the manufacture of a medicament for the treatment of human solid tumours and haematological malignancies expressing HER2.

12. ~~A combination for~~The use according to claim 11, ~~for use~~ in the treatment of breast cancer, particularly triple negative breast cancer.

13. ~~A combination for~~The use according to claim 11 or 12, wherein the therapeutic antibody is pertuzumab and the chemotherapeutic agent is a taxane, particularly docetaxel or paclitaxel, or an anthracycline, particularly doxorubicin, epirubicin, daunorubicin or valrubicin.

14. A pharmaceutical composition comprising a compound ~~for use~~ according to any one of claims 1 to 10 or a combination ~~for use~~ according to any one of claims 11 to 13, and one or more pharmaceutically acceptable excipients.
