(54) **Title:** URINARY DEVICE

(57) **Abstract:** A urinary directional device for improving the directional urination and health of a male user is provided, in which the device comprises a conduit (1) for the passage of urine and having a proximal end (3) adapted for engagement with the penis of the user and a distal end (5) having a distal aperture to enable the passage of urine from the conduit, the device having an interior surface providing one or more of a cleansing, an anti-bacterial or antiseptic or an anti-fungal function whereby the penis of the user can be cleansed by wiping on the interior surface of the device after urination and the device further comprising a health detection indicator capable of indicating abnormalities in urine indicative of disease or health-related conditions.
