(54) **Title:** RECEIVER DEVICE FOR FACILITATING WIRELESS POWER RECEPTION

FIG. 1

(57) **Abstract:** Disclosed is a receiver device for facilitating wireless power reception. The receiver device comprises a receiver transceiver configured for wirelessly communicating with at least one transmitter device. The receiver transceiver is configured for transmitting a registration request to the at least one transmitter device, wherein the registration request comprises a unique receiver device identifier, wherein the at least one transmitter device is configured for accessing a distributed block-chain associated with wireless power transfer. Further, the at least one transmitter device is configured for analyzing the registration request, updating the distributed block-chain based on the analyzing of the registration request and transmitting a registration response to the receiver device, wherein the receiver transceiver is configured for receiving the registration response.
