(54) Title: DATA PROCESSING SYSTEM

(57) Abstract

The invention provides for an apparatus for handling video data and including a storage device (162) containing a video for playback on a user system (54) located on a communications network (56) and a system connection (150) to a data processing system (100) and a network connection (158) to the communications network (56). The apparatus further includes a transfer means for transferring the video from the storage device (162) to the network (56) using the network connection (158), wherein the video is directly transferred from the apparatus to the network (56).
