(54) Title: A LIGHT EMISSIVE DEVICE STRUCTURE AND A METHOD OF FABRICATING THE SAME

Figure 1

(57) Abstract: A light emissive device structure and a method for forming a light emissive device structure are provided. The structure comprises a transparent substrate; a transparent electrode formed on the transparent substrate; one or more light emitting layers formed on the first transparent electrode; a reflective electrode formed on the one or more light emitting layers; and a textured layer formed on the transparent substrate for enhancing light contrast of the device. Advantageously, the structure further comprises a gradient refractive index layer.
