

[Title of Invention]

Disposable diaper

[ABSTRACT]

In a disposable diaper (10) according to the present invention, a crotch stretching unit (200a) is provided so as to be spaced from a respective one of a waistline retaining unit and a leg elastic member (71); a non-elastic region is provided at a respective one of a front waistline region (20) side and a back waistline region (30) side of a product longitudinal direction (L) of the crotch stretching unit (200a); there is provided an indicator (600) which runs across the crotch stretching unit (200a) and extends in the product longitudinal direction L and which is configured to produce a visual change if the indicator comes into moisture; and the change as mentioned above can be visually recognized from a non-skin contact surface side (S1) of the disposable diaper (10).
