

Abstract

A warning lamp for vehicles, comprising a light-permeable hood which is seated on a lamp socket and which is connected to a light bulb arranged within the hood, with a rotary reflector arranged within the hood, and with a drive for rotating the reflector arranged within the hood and non-rotationally connected to the lamp socket, and comprising a motor without collectors and gearing so as to increase the lifespan and to simplify and reduce costs of construction. The rotor of the motor is then arranged outside the stator.
