(54) Title: GALLERY APPLICATION FOR CONTENT VIEWING

(57) Abstract: A gallery software application enables a user to browse, view, and interact with various content items, such as still images and videos. The gallery includes a graphical user interface, where a content item is represented by an image. A group of content items is represented by a displayed stack of partially-overlapping images. A content item is associated with geo- location information and timestamp information. This information is used to divide the content items into groups.
