(54) Title: RECOMBINANT ADENO-ASSOCIATED VIRUS (RAAV) PRODUCTION IN INSECT CELLS

FIG. 1

(57) Abstract: Materials for efficient production of recombinant baculovirus seed stocks containing a nucleic acid sequence that encodes a gene of interest and methods of producing recombinant baculovirus seed stocks containing a nucleic acid sequence that encodes a gene of interest are provided. Also provided are rapid methods of producing rAAV comprising a nucleic acid having a nucleic acid sequence that encodes a gene of interest; the method allows production of rAAV at a high titer.

Declarations under Rule 4.17:

- *as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))*
- *as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))*

Published:

- *without international search report and to be republished upon receipt of that report (Rule 48.2(g))*
