

Title: System and method for managing replacement of consumables
 including recyclable gas purifiers

Abstract

A system and a method for managing replacement of consumables, the system including an installed base of equipment assemblies, an installed base of consumables, the consumables including recyclable gas purifiers having a limited lifetime and being used in combination with a said equipment assembly. The system includes a server for registering the consumables and having a module for calculating a replacement advice with respect to the consumable that has been registered in the server. A web portal provides a provider or an end user access to the server via the internet. Various data relating to the end user, its equipment assemblies and its consumables may be inputted via the web portal and the replacement advice that is associated with the registered consumables may be outputted via the web portal.
