

ABSTRACT
AIR-CONDITIONING APPARATUS

An indoor unit (101) for an air conditioning device (100) has a housing (110) and an indoor heat exchanger (7) which is disposed within the housing (110) and to which a combustible refrigerant is supplied. A display section (160) is provided to the lower surface (114) of the housing (110) together with a nameplate section (150), and the display section (160) displays the minimum distance (installation height (HO)) of the housing (110) from a floor surface (92) when the indoor unit is installed on a wall surface (91) of a room (90).
