(54) **Title:** TECHNIQUES FOR DISPLAY COLOR CORRECTION

FIG. 1

(57) **Abstract:** A display correction system (12) including a display (18) and a control system (16) including processing circuitry (26) and a memory (28), the memory storing instructions that, when executed by the processing circuitry (26), are configured to cause the processing circuitry (26) to determine a first guest configuration in a ride vehicle (14) during a first ride cycle, and determine a first view point based on the first guest configuration. The instructions are also configured to cause the processing circuitry (26) to generate a first color correction layer based on the first view point and apply the first color correction layer to the display (18).
