

MODULAR PRINTER AND PRINthead ASSEMBLY THEREFORE**ABSTRACT**

A printer includes a print head assembly having at least one print head molding which supports an elongate print head chip for effecting pagewidth printing. The molding defines at least one ink gallery for supplying ink to the chip and at least that portion of the molding carrying the chip being arcuate, when viewed end-on, to define a receiving zone. A print media feeder is arranged adjacent the molding so that a portion of the print media feeder nests in the receiving zone such that the print head chip lies within a footprint of the feeder.
