

ABSTRACT

The present invention belongs to the field of biomedicine, and relates to use of an anti-HER2 antibody-drug conjugate in the treatment of breast cancer. The present invention also relates to use of the anti-HER2 antibody-drug conjugate in the preparation of a medicament for treating breast cancer in a subject. The present invention further relates to a method for treating breast cancer in a subject, the method comprising administering to the subject the anti-HER2 antibody-drug conjugate. The method provides benefits to breast cancer subjects and demonstrates good safety.
