ning of each regular issue of the PCT Gazette.

(54) Title: METHOD AND APPARATUS BY WHICH A HOME NETWORK CAN DETECT AND COUNTERACT VISITED
NETWORK INBOUND NETWORK TRAFFIC REDIRECTION

(57) Abstract: The present invention provides methods, systems and apparatus by which a home common carrier telecommunications
network (such as an HPMN) or other concerned parties can detect and defeat technological measures employed by a visited common
carrier telecommunications network (such as a VPMN) to direct telecommunications traffic by subscribers to that home network
towards that visited network while roaming within the coverage area of that visited network.
