A B S T R A C T

PROCESS FOR MANUFACTURING ELASTICALLY
STRETCHABLE AND CONTRACTIBLE COMPOSITE SHEET

5

In the process for manufacturing a composite sheet 1 by joining a second web 52a made of thermoplastic synthetic fiber and capable of inelastic extension to at least one surface of a first web 41a capable of elastic stretch and contraction in an intermittent manner, a step of extending the first web 41a and a step of allowing the first web 41a to retract and a step of joining a second web 52a to the second web 41a while in a retracted state are included.
