(54) Title: SYSTEM AND METHOD FOR CONTROLLING DIGITAL ASSETS

FIG. 1

(57) Abstract: Method and system of controlling by a control authority (2) emission or destruction of digital assets from a request received by an accredited ledger (8), so that the control authority can access to the ledger (8) for reading data stored therein. The request may relate to transfer registration of digital asset towards an account or between two accounts. Requests include stamp time and store and updated balance. In particular, the ledger (8) registers the transfer according to the received request by updating balances only in case the updated digital account balance of the account to be debited is positive.
