(54) **Title:** TOUCH CONTROL MODULE

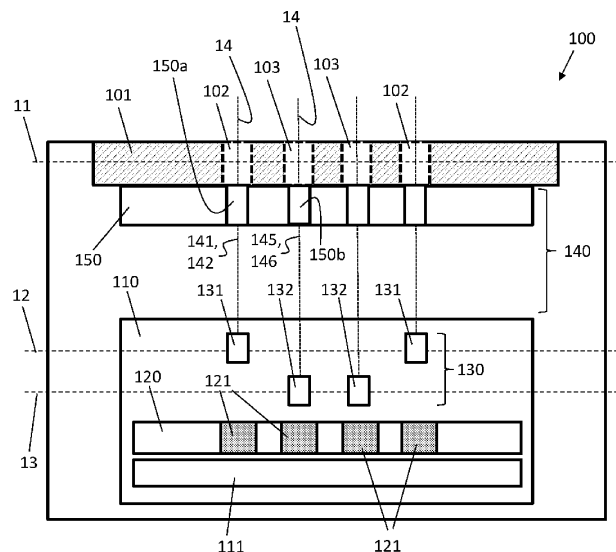

FIG. 1

(57) **Abstract:** There may be provided a touch control module with a lighting arrangement. The lighting arrangement may include at least one main light source for illuminating at least one primary light transmissible region of a touch plate of the touch control module and at least one auxiliary light source for illuminating at least one auxiliary light transmissible region of the touch plate. The touch control module may include a light-channelling which may shield the at least one primary light transmissible region from the at least one auxiliary light source and shield the at least one auxiliary light transmissible region from the at least one main light source.
